DAMIANO TESTA

(Jacobs University)

will speak on

Rationally Connected Varieties

Date: Monday, October 15, 2007

Time: 17:15

Place: Lecture Hall Research II, Jacobs University

Abstract:

The main goal of the talk is to define rationally connected varieties and explain why they are important. I will present evidence supporting the claim that they are a large class of simple varieties with interesting properties.

The talk is entirely self-contained, with as little background required as possible.

Colloquium Tea at ca. 16:45 in the Tea Room of Research II, close to the lecture hall. Everybody is welcome!
